Release 2.2

Gustavo Picon

Mar 13, 2017

Contents

1 Installation	1
1.1 Prerequisites	1
1.2 Installing	1
2 API	3
3 Indices and tables	5
Python Module Index	7

CHAPTER 1

Installation

Prerequisites

dynpool needs at least **Python 2.6 or 3.2** to run.

Installing

You have several ways to install dynpool.

From PyPI

You can install the release versions from [dynpool's PyPI page](#) using pip:

```
$ pip install dynpool
```

or easy_install:

```
$ easy_install dynpool
```

setup.py

Download a release from the [dynpool download page](#) and unpack it, then run:

```
$ python setup.py install
```

CHAPTER 2

API

CHAPTER 3

Indices and tables

- genindex
- modindex
- search

Python Module Index
